Thermo Scientific Incubator/Shakers

The Thermo Scientific iEMS Incubator/ Shakers are reputed as highperformance. The iEMS Incubator/ Shaker is designed for ELISA applications, and the iEMS Incubator/ Shaker HT is used when elevated temperatures up to 69°C are needed.

With superior temperature control and efficient orbital shaking, the iEMS Incubator/Shakers dramatically increase sensitivity and specificity of the ELISA assays and reduces incubation times, providing high performance and productivity meeting even the highest assay demands.

Accurate temperature control for reliable assays

The unique design of the thermal microplate holder eliminates the edge effect and ensures the microplates are heated evenly from all sides. The accurate temperature uniformity across the whole plate offers high reliability for assays requiring elevated temperatures.

Orbital shaking for increased productivity

The iEMS Incubator/Shakers incorporate a powerful variable-speed orbital shaker, ensuring efficient mixing for even very viscous liquids. And most importantly, the shaking motion

enhances the reaction in wells and reduces incubation times for higher throughput and productivity.

Flexible temperature selection and capacity

The iEMS Incubator/Shaker provides constant incubation temperatures up to 40°C, while the iEMS Incubator/Shaker HT allows incubation at up to 69°C.

The iEMS Incubator/Shaker and iEMS Incubator/Shaker HT are designed for flexible sample capacities, processing three or up to nine microplates at a time, respectively.

Thermo Scientific iEMS Microplate Incubator/Shaker HT

A high-performance 96-well plate incubator and orbital shaker for assays requiring temperatures up to 69°C.

Thermo Scientific iEMS Incubator/Shaker

A high-performance microplate incubator and shaker designed for ELISA applications.
